

Using and Understanding Mathematics: A Quantitative Reasoning Approach, 6th Edition **Bennett & Briggs**: ISBN13: 9780321914620

TABLE OF CONTENTS

KEY: Required; Strongly Recommended; Optional

PART ONE: LOGIC AND PROBLEM SOLVING

1. Thinking Critically

1A Living in the Media Age logic, argument, fallacy

1B Propositions and Truth Values proposition

1C Sets and Venn Diagrams Set, categorical propositions, Venn diagram

1D Analyzing Arguments Inductive and deductive argument

1E Critical Thinking in Everyday Life critical thinking

2. Approaches to Problem Solving

2A Working with Units units, dimension analysis

2B Problem-Solving with Units energy units; power units; density, concentration

2C Problem-Solving Guidelines and Hints four step problem solving process

PART TWO: QUANTITATIVE INFORMATION IN EVERYDAY LIFE

3. Numbers in the Real World

3A Uses and Abuses of Percentages absolute change, relative, change, absolute and relative difference

3B Putting Numbers in Perspective scientific notation, order of magnitude

3C Dealing with Uncertainty significant digits, random, systematic, absolute, relative error; accuracy precision

3D Index Numbers: The CPI and Beyond index number, reference value, (CPI), inflation

3E How Numbers Can Deceive: Polygraphs, Mammograms, and More false and true positive; false and true negative

4. Managing Money

4A Taking Control of Your Finances budget

4B The Power of Compounding principal; simple and compound interest; APR, APY

4C Savings Plans and Investments savings

4D Loan Payments, Credit Cards, and Mortgages installment loan, mortgages

4E Income Taxes

4F Understanding the Federal Budget

PART THREE: PROBABILITY AND STATISTICS

5. Statistical Reasoning

5A Fundamentals of Statistics distribution, mean, median, mode, outlier, symmetric distribution, skewed, variation

5B Should You Believe a Statistical Study? Range, quartiles, five-number summary, boxplot, standard, deviation

5C Statistical Tables and Graphs

5D Graphics in the Media

5E Correlation and Causality

6. Putting Statistics to Work

6A Characterizing Data

6B Measures of Variation

6C The Normal Distribution

6D Statistical Inference

7. Probability: Living with the Odds

7A Fundamentals of Probability outcome, event, theoretical & empirical probability; subjective probability, probability distribution skip odds?

7B Combining Probabilities and probability, either/or probability, overlapping events

7C The Law of Large Numbers law of large number, expected value, gambler's fallacy, house edge

7D Assessing Risk

7E Counting and Probability – arrangements, permutations, combinations

PART FOUR: MODELING

8. Exponential Astonishment

8A Growth: Linear versus Exponential – linear growth, exponential growth, doublings

8B Doubling Time and Half-Life – doubling time, half life, rule of 70

8C Real Population Growth – overall growth rate, carrying capacity, logistic growth, overshoot and collapse

8D Logarithmic Scales: Earthquakes, Sounds, and Acids

9. Modeling Our World **Activity page 514 & 515**

9A Functions: The Building Blocks of Mathematical Models mathematical model, function, domain, range, periodic function

9B Linear Modeling – linear function, rate of change, (slope) initial value (y –intercept)

9C Exponential Modeling – exponential function, radiometric dating

10. Modeling with Geometry

10A Fundamentals of Geometry

10B Problem Solving with Geometry

10C Fractal Geometry

PART FIVE: FURTHER APPLICATIONS

11. Mathematics and the Arts

11A Mathematics and Music

11B Perspective and Symmetry

11C Proportion and the Golden Ratio

12. Mathematics and Politics

12A Voting: Does the Majority Always Rule?

12B Theory of Voting

12C Apportionment: The House of Representatives and Beyond

12D Dividing the Political Pie
